

Visqueen Temporary Protective Sheeting (TPS)

Features and benefits

- Large roll format - Ideal for draping, screening, covering or hanging
- Barrier properties - provides protection against showers and dust
- LDPE based - recyclable and reusable
- Multi-use - provides protection for various applications whilst buildings undergo refurbishment or in new build projects

Product description

Visqueen Temporary Protective Sheeting is manufactured from 100% recycled polyethylene. The product is 125 µm thick (500 gauge / 0.125mm) and available 4m x 50m. The roll is supplied multi folded and has a nominal weight of 26.5kg.

The product is available in the following colours: natural (translucent) or black.

Approvals and standards

- Quality Management System ISO 9001:2015
- Occupational Health and Safety System ISO 45001:2018
- Environmental Management System ISO 14001:2015

Usage

Visqueen Temporary Protective Sheeting is a temporary covering commonly used to protect flooring, vertical surfaces, and fixtures and fittings from the effects of dust. It is durable and helps contain dirt and any spillages.

The sheeting is available in a large format multi-folded roll which is labour saving and allows large areas to be covered fast with less jointing. The ease of fit helps speed up the protection process, reducing the risk of damage to exposed finishes.

System components

- VisqueenPro Single Sided Tape, 75mm x 25m

Visqueen Temporary Protective Sheeting (TPS)

Storage and handling

Visqueen Temporary Protective Sheeting should be stored horizontally, under cover in its original packaging.

Care should be taken when handling the product in line with current manual handling regulations.

Preparation

Visqueen Temporary Protective Sheeting can be cut with a sharp retractable safety knife or robust scissors.

Surfaces to be covered should be free from sharp protrusions. The film should be installed as soon as all surfaces or fixtures are clean.

Installation

Unroll Visqueen Temporary Protective Sheeting and cut to fit the area that needs protecting.

For large covered areas it may be necessary to lap adjacent film sheets and a taped joint is recommended to ensure continuity of protection. When taping, allow an overlap of at least 50mm and secure the joint using VisqueenPro Single Sided Tape. Prior to taping ensure that the lap area is clean and free from dust and any moisture.

Usable temperature range

It is recommended that VisqueenPro Single Sided Tape should not be installed below 5°C.

Additional information

Visqueen Temporary Protective Sheeting is recyclable and categorised under LDPE recycling code 4.

Visqueen is part of Berry bpi, the largest European recycler of polyethylene. This product is recyclable and should be segregated on site in accordance with site management procedures for plastic waste. We have 4 recycling sites in the UK where the plastic waste could be recycled and converted back into a second life product.

Visqueen Technical Support

Visqueen combine an extensive product portfolio with industry leading levels of service and support which includes guidance over the phone, bespoke CAD drawings to help with complex detailing, electronic NBS specifications and access to a dedicated team of highly knowledgeable and experienced field based Technical Support Managers.

Visqueen Technical Support is available to all our customers including architects, specifiers, distributors, builders merchants, contractors and end users. All of our technical team have been awarded the industry recognised qualification Certificated Surveyor in Structural Waterproofing (CSSW).

Visqueen CPD Seminars

The Visqueen Continuing Professional Development (CPD) Seminars provide up-to-date information on changes within Building Regulations/Building Standards and nationally recognised industry guidance affecting damp proofing, water vapour control, hazardous ground gas protection and below ground structural waterproofing.

The one hour seminars have been produced for design specialists within the construction sector and are delivered by our team of Technical Support Managers.

Visqueen PI designs and special projects

From initial design to the completed project, Visqueen are with you every step of the way. Whether it be hazardous ground gas protection and/or below ground waterproofing protection employing barrier, structurally integral or drained systems, Visqueen can offer professional indemnity (PI) insurance for bespoke Visqueen design solutions.

Visqueen Technical Support Managers work with all stakeholders to provide cost effective Visqueen solutions offering complete peace of mind throughout the construction phase and beyond.

Visqueen Training Academy

Based at our manufacturing facility in Derbyshire, the Visqueen Training Academy is available to support Visqueen customers throughout the UK by providing a wide range of both theory and practical skills related training.

Courses include one day product awareness training for our distributors and builders merchants to help them in their day-to-day jobs, through to intensive three day courses giving detailed hands-on training in the practical skills required for safe and robust product installation.
