

Waterstop Mastic

Page 1

nbsPlus

- Part of the Visqueen High Performance Waterstop system
- Secures and seals Visqueen VX Waterstops in vertical and pile cap applications

Description and Application

Visqueen Waterstop Mastic secures and seals Visqueen VX Waterstops in-situ concrete vertical joints and and pile cap applications.

Visqueen Waterstop Mastic is non-toxic and chemically inert, it has the same composition as Visqueen VX Waterstops , however it contains additional polymerised liquid to create a trowellable grade of mastic which can be applied as a bedding mastic for waterstops. The Visqueen Waterstop Mastic can also be applied as injectable mastic by injection through a mastic or grease gun.

The Visqueen Waterstop Mastic is available in 10kg buckets.

Caution

Visqueen Waterstop Mastic is a soft mastic material which will never set or harden, although it will dry if it is left exposed and as such should be covered in all its final usage.

Installation

For installation instructions please refer to the individual datasheets for:

- Visqueen VX25 Waterstop – for in-situ concrete vertical joints and joints
- Visqueen VX90 Waterstop – for 90o internal angles and seal around pipe penetrations including pile caps
- All projects must be assessed on an individual basis as installation details may differ. For project specific recommendations contact the Technical Department at Visqueen on 0845 302 4758 or enquiries@visqueenbuilding.co.uk

Storage and Handling

Visqueen Waterstop Mastic is packaged in 10kg sealable buckets to retain moisture within the product. Buckets must be stored on pallets. Once opened the pallets must be stored under cover or covered with a protective waterproof sheet to prevent rain damage. Surplus material may be re-used provided it is immediately re-sealed and stored appropriately.

Technical support throughout your project

We are specialists in our field and can help you specify the correct solutions with the necessary performance levels, in accordance with building regulations.

- Nationwide site support team
- Specification advice
- Installation guidance & project sign off
- System design including CAD details

CPD Seminars and Training Academy

Gas Protection CPD

The specification, technical design, and installation of gas protection systems, enabling the sustainable regeneration of brownfield sites.

Structural Waterproofing CPD

The specification, technical design, and installation of structural waterproofing systems for protection against water and damp ingress in both above and below ground projects.

Visqueen Training Academy

We are now able to offer exclusive in depth training opportunities on a wide variety of Visqueen products at our Training Academy.

Visqueen Special Projects

We provide high-level expertise, comprehensive support and experience in all types of waterproofing and gas protection.

The information given in this datasheet is based on data and knowledge correct at the time of printing. Statements made are of a general nature and are not intended to apply to any use or application outside any referred to in the datasheet. As conditions of usage and installation are beyond our control we do not warrant performance obtained but strongly recommend that our installation guidelines and the relevant British Standard Codes of Practice are adhered to. Please contact us if you are in any doubt as to the suitability of application.
