

Visqueen Door Sleeves LPCB approved to LPS1207

- **Approved to LPS1207**
- **Protection against scratches, dust, dirt, paint etc**
- **Helps reduce the potential costs of damage**
- **Now available in Handy Packs (20s)**

Description

Visqueen Door Sleeves is LPCB approved to LPS1207 compliant film, designed to protect doors during the refurbishment process. Visqueen Door Sleeves can be simply and quickly applied to universal door fittings, and can be held in place with Megafilm jointing tape, providing a flame retardant, waterproof barrier to suit a range of demanding environments. Visqueen Door Sleeves are designed to provide high quality protection against scratches, dust, dirt, paint and mortar splashes. The Door Sleeves can also reduce costly damage to pre-finished doors during the refurbishment process. Visqueen Door Sleeves are supplied on a roll containing 50 bags per reel or in a Handy Pack (20 per pack). Each sleeve is 2200mm x 915mm allowing the sleeve to be fitted to most metric and imperial doors with ease.

Certification

Visqueen Door Sleeves has accreditation to LPS 1207, Certified by Loss Prevention Certification Board in compliance with Loss Prevention Standard (Certification number-521a/02). LPS 1207 is the performance standard for protective materials that are used internally whilst buildings undergo refurbishment or construction. The protective materials used must conform to the requirements of the standard to be deemed LPS 1207 compliant. Visqueen is certified by the Loss Prevention Certification board in compliance with Loss Prevention Standard LPS 1207 which requires that the following standards are met:

- Ignitability (Small & Large tests) (BS 476: Part 12:1991 & LPS: BS5852)
- Smoke Emissions Test (prEN 2825 & prEN 2824)
- Toxic Gas Emission Test (prEN 2826 & prEN 2824)
- Critical Oxygen Index (BS 2782: Part 1: Method 141: 1986)

Using Visqueen Door Sleeves will significantly diminish fire loading. Furthermore, the use of LPS 1207 approved products is an assurance that ample and reasonable steps have been taken to reduce fire risk. All products have the relevant accreditation body approval mark and manufacturers certificate number.

Installation

Visqueen Door Sleeves can be fitted to most metric and imperial doors with ease. Simply tear a sleeve from the roll at the perforation mark, and using the open end, pull the sleeve over the door. At the hinge door end, thread one side of the film through and over lap the sleeve by at least 150mm; then seal the lap with Visqueen Megafilm tape. Any surplus film can be folded over the top of the door and should be secured with Visqueen Megafilm tape to ensure a snug fit, this will allow the door to remain in operation whilst preventing cosmetic damage. **The use of non-certificated LPS 1207 materials could result in the withdrawal of insurance cover in the event of fire.**

About Visqueen

Visqueen is the market leader in the manufacture and supply of structural waterproofing and gas protection systems. Visqueen offers the complete package – a proven, reliable range backed by a technical support service that goes unmatched in the market - everything you would expect from a reputable and ethical company.

Complete Range, Complete Solution

- Structural Waterproofing
- Damp Proof Course
- Damp Proof Membranes
- Gas Protection and Gas Venting
- Vapour Control Layers
- Stormwater Protection

Find your local stockist

Search our directory of Visqueen specification [Specialist Centres](#) to locate your nearest Visqueen Partner.

Technical support throughout your project

We are specialists in our field and can help you specify the correct solutions with the necessary performance levels, in accordance with building regulations.

- Nationwide site support team
- Specification advice
- Installation guidance & project sign off
- System design including CAD details

CPD Seminars and Training Academy

Gas Protection CPD

The specification, technical design, and installation of gas protection systems, enabling the sustainable regeneration of brownfield sites.

Structural Waterproofing CPD

The specification, technical design, and installation of structural waterproofing systems for protection against water and damp ingress in both above and below ground projects.

Visqueen Training Academy

We are now able to offer exclusive in depth training opportunities on a wide variety of Visqueen products at our Training Academy.

Visqueen Special Projects

We provide high-level expertise, comprehensive support and experience in all types of waterproofing and gas protection.

The information given in this datasheet is based on data and knowledge correct at the time of printing. Statements made are of a general nature and are not intended to apply to any use or application outside any referred to in the datasheet. As conditions of usage and installation are beyond our control we do not warrant performance obtained but strongly recommend that our installation guidelines and the relevant British Standard Codes of Practice are adhered to. Please contact us if you are in any doubt as to the suitability of application.
