

Visqueen GX Retaining Discs

Page 1

nbsPlus

- Secures Pre Applied Membrane to vertical applications
- Suitable for formwork or adjoining structure

Description

A plastic disc 50mm x 35mm head supplied in boxes of 500

Application

Visqueen GX Retaining Discs secures Pre Applied Membrane to vertical applications such as formwork or adjoining structures

Installation

Visqueen Retaining Discs are available to provide a means for securing the leading edge of the membrane to shuttering. The membrane should be installed with the textured surface facing away from the shuttering.

Using oval nails, Visqueen Retaining Discs should be mechanically fixed, at maximum 400mm centres, to the internal face of the shuttering. Using a suitable power tool and 6mm drill bit to create a pilot hole in the membrane, the Visqueen Pre Applied Membrane should be secured over the protruding section of the retaining disc. The top edge of the membrane should be trimmed to

approximately 20mm below the top edge of the slab. Once the concrete has set, the oval nails should be removed by pulling through from the external face of the shuttering. When the shuttering is removed the Visqueen Retaining Discs should be visible on the external (smooth) face of the membrane. Continuity of the membrane system with the damp or gas proof course is maintained using Visqueen GR Self Adhesive Membrane (see Visqueen Typical Details).

Technical

Dimensions – 50mm x 35mm

Packaging – 500 per box

Storage

Store in a warm – above 5oC – and dry environment.

About Visqueen

Visqueen is the market leader in the manufacture and supply of structural waterproofing and gas protection systems. Visqueen offers the complete package – a proven, reliable range backed by a technical support service that goes unmatched in the market - everything you would expect from a reputable and ethical company.

Complete Range, Complete Solution

- Structural Waterproofing
- Damp Proof Course
- Damp Proof Membranes
- Gas Protection and Gas Venting
- Vapour Control Layers
- Stormwater Protection

- Standard Details
- Technical Service
- Visqueen Gas Protection Brochure
- NBS Clauses
- BBA Certificates
- Material Safety Datasheets
- Specification Guide

Find your local stockist

Search our directory of Visqueen specification [Specialist Centres](#) to locate your nearest Visqueen Partner.

Technical support throughout your project

We are specialists in our field and can help you specify the correct solutions with the necessary performance levels, in accordance with building regulations.

- Nationwide site support team
- Specification advice
- Installation guidance & project sign off
- System design including CAD details

CPD Seminars and Training Academy

Gas Protection CPD

The specification, technical design, and installation of gas protection systems, enabling the sustainable regeneration of brownfield sites.

Structural Waterproofing CPD

The specification, technical design, and installation of structural waterproofing systems for protection against water and damp ingress in both above and below ground projects.

Visqueen Training Academy

We are now able to offer exclusive in depth training opportunities on a wide variety of Visqueen products at our Training Academy.

Visqueen Special Projects

We provide high-level expertise, comprehensive support and experience in all types of waterproofing and gas protection.
