THE PROVEN RANGE
FOR HIGH PERFORMANCE
TANKING AND
DAMP PROOFING
A TRIED AND TESTED SYSTEM FROM THE SPECIALISTS IN DAMP PROOFING

Visqueen Building Products is one of Europe’s leading manufacturers of damp proofing and gas protection systems offering a comprehensive range of solutions to protect buildings from the ingress of harmful ground gases and damaging water and damp.

Visqueen’s Self Adhesive Membrane (SAM) range provides an all encompassing, one source of supply for your high performance damp proofing requirements. Ideal for general waterproofing and also tanking applications including basements, lift pits, reinforced concrete slabs and retaining walls, the Visqueen SAM system is ideal for use in challenging cold weather conditions.

- BBA approved
- Tough, high performing system
- For tanking and damp proofing applications
- Ideal for use in low temperatures
- One stop shop damp proofing system

BACKED BY COMPLETE SERVICE AND SUPPORT

Like all Visqueen products, our damp proofing range is backed by exemplary levels of service and support. This includes access to training delivered by our nationwide team of Technical Support Managers and tailored to your specific needs. For specifiers this can include CPD seminars whilst stockists such as merchants can benefit from training designed to equip you and your staff with in-depth and invaluable product knowledge.

Self Adhesive Membrane
A BBA approved self adhesive membrane to prevent the ingress of water in vertical and horizontal tanking and damp proofing applications.

Gas Resistant Self Adhesive Membrane
A self adhesive membrane with aluminium foil to prevent the ingress of carbon dioxide, radon and methane gases in above and below ground applications.

TorchOn Tanking Membrane
A robust BBA approved waterproofing membrane for heavy duty tanking applications such as basements, lift pits & retaining walls; ideal in cold weather conditions.

TreadGUARD
A tough heavy duty 100% recycled board designed to protect membranes from following trades after installation; BBA approved and complies with BS 8102:2009.

HP Tanking Primer
A bituminous priming solution that gives a superior bond for torch applied or self adhesive membranes; fast installation; suitable for green concrete and damp surfaces.
